

1. Replace the forehead band. Follow the instructions in the eSight 3 User Guide.
2. To adjust, hold the forehead band as shown, and slide the ratchet strip forward or backward to enlarge or shorten the band.
3. Put on eSight 3, then connect and adjust the headstrap.

When properly fitted, you'll have a slight gap of approximately 1 mm between the top of your frames and your forehead. See "Achieving the Perfect Fit" in the eSight 3 User Guide.
