

See new possibilities

The best enhanced vision device is ready for life on the move

Life-changing technology, eSight enables people with low vision or legal blindness to achieve up to 6/6 visual acuity. eSight stimulates synaptic nerve activity to increase visual information to the brain. Clinically proven, eSight is used by thousands of people with macular degeneration, diabetic retinopathy, Stargardt's disease and more.

eSight 4

Empowering people with low vision

Advance in school

'eSight has improved my educational experience dramatically. I passed my first semester of college and, without eSight, I have no idea how I would have done it.' - Jesse, age 21

Return to work

'In addition to taking care of my family, I work full-time and independently do all the things most people take for granted.' - Yvonne, age 34

See new possibilities

'I can remember the first time I saw my wife's face. I'll never forget that day how it changed the course of the rest of my life.' - Gary, age 62

'eSight removes the traditional barriers that people living with low vision face. Enhancing sight significantly while retaining mobility, eSight makes it possible for people with legal blindness to advance in all levels of school, achieve their professional goals and more easily participate in society.'

Dr Scott Gartner, Low Vision Specialist, Lighthouses for the Blind, Palm Beaches and Miami

eSight

See new possibilities

The new standard for enhanced vision

eSight 4 delivers:

Best acuity

Enabling more people who are legally blind to achieve 6/6 enhanced vision.

- ✓ Best-match 18 MP camera with 2 bright 1280x960 high-resolution screens for full binocular vision.
- ✓ Advanced sensors and proprietary algorithms maximise the quality of information sent to the brain.
- ✓ Adjustable pupillary distance for optimal field of view.
- ✓ See clearly: 24X zoom, colour, focus and contrast settings; TV, reading, indoor, outdoor and custom vision modes.

Superior mobility

Move through the day seamlessly, from reading to outdoor activities.

- ✓ Wireless and hands-free device with built in controls.
- ✓ 100% use of natural peripheral vision.
- ✓ Patented bioptic tilt: Tilt down for enhanced vision and up to connect face-to-face or to walk in new places.
- ✓ Easy-swap rechargeable batteries: each with up to 3 hours continuous use.

All-day comfort

Designed for mobility and wearing comfortably for hours at a time.

- ✓ Lightweight, streamlined eyewear.
- ✓ Halo comfort band adjusts to size with an inner lining that feels good on the skin.
- ✓ Unique back battery balances weight perfectly for carefree wearing.
- ✓ Fits over prescription glasses for even greater enhanced vision.

eSight 4 delivers:

Connected entertainment

Share the moment and maximise your screen viewing pleasure.

- ✓ Take photos and videos and optionally share them using your smartphone.
- ✓ Stream in HD from your phone or TV directly to your eSight.
- ✓ View tiny details on your phone screen with the powers of freeze, zoom and save.

Easy to use and learn

Take control of your vision with intuitive controls and eSupport.

- ✓ Immediate enhanced vision.
- ✓ Master advanced controls easily with graduated learning.
- ✓ Invite loved ones to see what you see and help customise your experience.
- ✓ Automatic updates.
- ✓ Choice of headset controls, wireless remote and Apple® and Android® mobile apps.

See what's possible with eSight

Join thousands of low-vision people achieving their goals with eSight.

- ✓ See the faces of loved ones.
- ✓ Garden, cook, shop and more.
- ✓ Enjoy TV, books and hobbies.
- ✓ Start new jobs or return to them.
- ✓ Attend school at all levels.
- ✓ Visit new places with greater confidence.

The clinically validated approach

The eSight Quality of Life and Efficacy Study (eQUEST, ClinicalTrials.gov Identifier NCT02616900) consists of six independent clinical studies conducted at world-renowned low vision research institutions. Published in the Journal of Optometry and Vision Science, the study demonstrated significant improvement when using the low vision aid including:

**A seven-line gain
in distance acuity**

**100% mobility
retention**

**12 letter contrast
improvement**

**Significant increase
in facial recognition**

'eSight provides unprecedented improvement in a number of visual performance measures. This device has a substantial impact on the lives of many people with severe vision loss.'

*Dr Gislin Dagnelie,
MS, Johns Hopkins
MedicineHealth Network*

The vision to do more

Our mission is to help people living with visual impairments to see new possibilities. eSight has been recognised for pushing the boundaries of vision technology from Health Tech's Best Wearable Technology and Time Magazine's Best New Inventions. Today, eSight has more than 60 patent filings with 30 issued patents.
