

# The Next Step in Your eSight Journey

## The Home Experience

### Try eSight in the comfort of your home

Our Home Experience is the easiest way to see how eSight 4 — a clinically validated assistive technology for individuals with vision impairment— fits, feels and enhances everyday life. Speak with one of our knowledgeable eSight Advisors to learn how eSight could enhance your vision.

### What can you expect?

#### eSight Advisor virtual demonstration

**We encourage you to invite your caregiver or loved one to be present during the advisor demo.**

- Baseline visual acuity and facial recognition assessments
- A tailor-made trial program designed to help you see and do more of things you loved to do
- In-depth device training and customization

#### The 7-day trial period

At the start of your trial an eSight 4 device will be shipped to your address. During the seven days you'll be able to implement your program, allowing you to integrate the device into your everyday life.

*"I can still remember seeing my wife's face for the first time and how that day changed the rest of my life."*

— Gary Foster

#### Your Next Steps

- 1 Call us to book your trial at **+1 855 837 4448**
- 2 Receive eSight in 5-7 business days
- 3 Try eSight with video support from an expert

## Try eSight 4 at home for \$99 USD (\$149 CAD)

Get everything you need to see if eSight is right for you. There are no hidden costs: two-way shipping, duties and taxes are all included.

- 7-day home trial
- 1-on-1 personalized training program
- Support from a friendly eSight Specialist
- Baseline visual acuity and facial recognition assessments
- Required training materials
- Hands-on training covers adjusting fit for comfort, connecting to stream content, using the contrast, magnification, and focus controls, and more.

### Things you can do during the trial period

- Go grocery shopping
- Do your homework
- Try it at work
- Read a book
- Go for walks
- Cook a meal
- Play boardgames
- Watch a movie

### Simplify Your Life With eSight

With eSight, you can control several visual features to customize your experience and enhance your sight based on your activity, environment, and visual acuity:

- Freeze frame and magnification (24X)
- Contrast enhancement
- False colour modes
- Share pictures and videos
- Connect and stream from other devices
- Flashlight for dimly lit environments

“Trying eSight 4 in the comfort of my home gave me a chance to explore all of its features and how the device can be integrated into my daily life before purchasing. The call with my Advisor provided me with the skills I needed to operate the device and I got to ask as many questions as I needed.”

– Jessica Jackson, eSight User
